VERY

VALUABLE REAL ESTATE

On account of change of residence, will be offered at Public Auction, on

Saturday, February 12th,

AT 12 O'CLOCK M., at SALES ROOM,

The Following Desirable Property!

That portion of Land situated to the east of Punahou College, owned by A. Marques, who has enriched a descript of most fertile soil by the treasures derived from an in-stransiable flowing well, supplying a yield of over 1,000 gallons per hour of the purest water for irrigating

of most fertile soil by the treasures derived from an inexhaustable flowing well, supplying a yield of over 6,000 gallons per hour of the purest water for irrigating and drinking purposes.

The preperty will be offered in two lots.

Lot let contains about 8 acres of best irrigable bottom land, andi4 acres of excellent high pasture grounds, together with the artesian well and a beautiful new and extra solidly built dwelling, two stories high, with fine view of the sea over Wikiki, containing 12 large airy rooms, with plenty of Labinets and store rooms; and an attic of three wide servants' rooms, also, outside kitchen, carriage house and other out-houses.

Over 500 Banana tress and plenty of algeroba trees are already growing on the land, which are entitled to half of the water flowing from the well.

Lot 2 contains nearly 7 acres, all irrigable, now leased by a Chinese Company for the purpose of a vegetable garden, for a term of nine years with the right of half the water from the artesian well situated on Lot No. I. At the end of the said lease all the improvements, and especially the fruit trees to be planted by the Chinese, are to remain for the benefit of the owner.

Both lots have been carefully drained and assured against flooding by rain water; both lots are nicely fenced in, and both lots—now bordering on the carriage road leading from Beretania street to Syiva's Ranch, in Manoa Valley—will have access to the new street, and outlet to be opened on the Punahou lands toward Punahou street, which will render both parts of said property valuable for building lots.

The above property if not sold as above will be offered in suitable building lots with water privilege. Plans of which may be seen at Sales Room.

For further particulars apply to

NOTES OF THE WEEK.

Tue road roller was out again yesterday, trot-ting up and down Fort street. A sum is being erected on Brewer & Co's wharf. The frame work has been put up.

The Band concert at Emma square on Saturday last was, as usually, largely attended. Samuer Kamaka is the name of the policeman who discovered the Chinamen with varioloid last

The report of another Chinamam being found on Thursday morning with small-pox was a "false The small-pox has almost disappeared from san Francisco. Latest advices report only two or three cases a week.

Nonai Kanalewai was examined before Police ustice Bickerton on Monday last and committed to the Iesane Asylum. THERE are now, including the deserted sailors of the Quinta and her passengers and others, about 200 persons in quarantine.

THE laying of a water pipe to the hospital on the reef will be completed to-day. Heretofore the water used there had to be carried over. NEXT Thursday, February 3rd, is the annual parade day of the Honolulu Fire Department. We hope to see each company out in full strength.

Professon Process who passed here on the City of Sydney en route to San Francisco, has been engaged to deliver a number of lectures in Cal-ifornia. CHINESE NEW YEAR festivities begin to-day, and we may expect for several days to hear the air made musical with the reports of exploding fire-prackers and bombs.

THERE are now three attendants on the small-pox patients on the reef—one white man and two natives—and there is no probability of a repeti-tion of the Olsen affair. The schooner Mana was released from quarantine last week and departed for Haiku, Maui, on the 21 st with the same passengers (Chinese laborers) that were on her when she was quarantined.

The Bishop of Honolulu has reluctantly post poned sine die his journey to the United States and England in consequence of the urgency of the duties requiring his personal supervision in the dio-

The weather has been unsettled and squally this week and considerable rain has fallen. Schooners from the other Islands with sugar have been delayed by head winds and the sailing of ressels from this port necessarily postponed. On two or three occasions the wind blew a gale. On Monday a brig was reported coming from the south, and for some time it was supposed the Government immigration vessel *Pomare* with la-borers from the New Hebrides, but she proved to be the Sheet Anchor, with 150 cords of fire wood from Pomare.

Mozz than once in the course of the last fort-night did we see the not very frequent spectacle of a square-rigged vessel running into the harbor and fore-and-aft rigged schooners beating out. The Storm Bird was towed out by the "ele on the 20th, owing to the prevalence of southerly winds.

John Moran the man in charge of the small pox patients on the reef, writes that he has fumigated the room in which Henry White was confined, and that one of the Chinamen there is very nearly well and that the pustules on the other are beginning to dry up. They were both very light cases. FOLLOWING is the programme for the Band consert at Emma Square, this afternoon at 4 o'clek. March—Brandenburgh Overture—In the Italian style. Corus—The Day of Judgment Selection—Italian Opera. Waltz—The Syrens Polka—A Good Kles.

In addition to the Berlin paper from which we give an extract, an Italian paper has a long article of self glorification evidently from the pen of Moreno himself. Beginning with a dose of flattery to that 'most wise man," supientissimo homo, David Kalakaus, it goes off into a laudation of the Ex-Minister himself and recapitulates, from a Moreno point of view, the differences between himself and Gen. Comly.

The steamer Zealandia arrived here from San-Francisco last Wednesday morning. She was three days behind time, but the delay was at San-Francisco where she had to wait until the 18th for the arrival of the European mails. She made the passage down in eight days. She passed the City of Sydney on the 23rd, and on the evening of the same day, about 7 p. M., all her mast heads and yard arms were beautfully illuminated with St. Elmo's fire. The phenomenon lasted half an hour.

Mr. W. Fowler, a member of the eminent firm of agricultural and general engineers of that name, arrived by the Zealandia bringing drawings and models of the steel railways, locomotive enginee, cars, etc., which his house is prepared to supply. Mr. Fowler has made his business headquarters at the office of the Hon. W. L. Green, over that of Mr. G. W. Macfarlane & Co. where the models, etc., may be inspected. For particulars see advertisements.

On Wednesday night and on Thursday we were visited by furious squalls from the west with frequent showers. The barometer stood lower than ever has been registered here before. We are informed by Professor Alexander that on Thursday at noon the barometer in his office in the Government Building, fell to 29-50. Our own aneroid at the same time stood .55 of an inch below the usual trade wind point. Yesterday was blustering and showery though with a slowly rising barometer.

Os Saturday last a matinnee was given at the Theatre by the California Company. The piece was the "Babes in the Wood." Long before the play began, the parquette and dress circle were well filled by our little folks, with a fair aprinking of their seniors, mostly of the gantler sex. The old nursery legend was consewhat departed from, in order to introduce more striking effects, a fairy, a ghost, etc. The orchestra was led by Mr. Berger, and the young ones enjoyed their treat immensely. In the evening "David Garrick" was given, followed by the musical farce, "The Artful Parker."

making good sugar from Mr. Drier's cane. THE new jail is now complete, and the contractors, Messrs. Chiselholm & Bro., deserve credit for their good work. It is a good strong building containing fourteen cells, is well put together and finished in the most substantial manner.

HAWAII NOTES. A LITERARY and musical entertainment was given at the foreign church at Hilo on Saturday evening, January 15th, by some of the home talent of the place. There was some fine vocal and instrumental music, recitations and readings, all of which were well rendered. More of such treats are to be given. No admission fee was charged, for a general invitation was extended to all, by notices posted up in conspicuous places in the town. There was a large attendance, and judging from the applause, all enjoyed the evening treat.

We have been permitted to copy the following extracts from a letter to Messra. C. Brewer & Co., from S. L. Austin Esq., Manager Onomes planta-tion. from S. L. Austin Esq., Manager Onomea plantation:

Onomea, January 20th, 1881.

Messrs C. Brewer & Co.—I have a very sad accident to report at the Onomea mill. On Monday last about 3 r. M. a carpenter by the name of Santo got his feet caught in the gear of the mill rollers, and both of his legs were crushed off, one above the knee, and the other one below the knee. The man had some work to do near the gearing, some three feet from it, and the engineer, Mr. Hopfe, cautioned him to be careful, as the wheel might revolve. He answered he would look out for himself, but, in changing his position, he carelessly stepped on the cog wheel, and the wheel revolving, caught his foot. I had just returned from the fields when I heard the man's cries. With all our efforts it was half an hour before we could release the poor man. He died at 7.15 r. M., just after the doctor's arrival. It is the first accident that ever occurred at the Onomea Mill, and was due to gross carelessues on the part of the man. The gear is always covered when we are grinding, but new chains had been put on, and it was necessary to have the covering off to test them.

PLANTERS' COLUMN. WE are permitted to copy the following extract from a letter by Measrs. Hoffnung, of St. Michaels, Azores, addressed to the President of the Board of Immigration, by which it will be seen that 351 passengers embarked on board the Highflyer for this port. Amongst these we notice 65 married couples, 108 children in all. This will be a very important addition to our wage-earning population. The Highly was to sail from St. Michaels December 18th, and may be expected here about the middle or

fit twee given. Those who derive the greetest cool from the Library and Reading Room west the ones in conspicion to the Library and Reading Room west the ones in conspicion to the Library and Reading Room west the ones in conspicion to the constitution is a benefit to the city and to all of our people, and every one should feel it a duty and pleasure to contribute his or her mite, in some manner, toward defraying the expense of its main temance.

"Tux regular consumption of sugars on this const," says the San Francisco Merchant, "which is increasing every year, and the probability than o refined sugars will be brought from New York the Future, made 100 the word of the consumption of the sugar will be brought from New York the Library was a superior of sugars on the future years. It does not seem probable that the Islanda can furnish this quantity this year. To do so there must be an increased yield over last year of about 18,000 tons. The tendency in all countries is to an increased yield over last year of about 18,000 tons. The tendency in all countries is to an increased yield over last year of about 18,000 tons. The tendency in all countries is to an increased yield over last year of about 18,000 tons. The tendency in all countries is to an increased yield over last year of about 18,000 tons. The tendency in all countries is to an increased yield over last year of about 18,000 tons. The tendency in all countries is to an increased yield over last year of about 18,000 tons. The tendency in all countries is to an increased yield over last year of the children, in the countries is to an increased yield over last year of the children, in the proportion of service and ways, precisely years are increasing consumers of sugars.

A zzw days since on one of the back streets of the city not much frequented, we noticed a lighting a barrier of the consumption of the street of the consumption of the consumption of the street of the consumption of

The self-light time of the stay of the sta

of the laborers with regard to their food, to offer them a scale of wages based upon their maintaining themselves. When the planter is to feed them they naturally look for more than when they have to provide for themselves. They are accustomed here to live upon the simplest fare. The additional wages for self-maintenance could easily be put down at an amount less than it would cost the planter and would no doubt still be ample for them. In case of such an arrangement, we would suggest that it be made to commence in a few months after the laborer's term of service commences, so that he could in the meantime initiate himself in the way of provi ling for himself and family, and if it were possible to give him a small patch of land or to sell it to him with power of purchase, from which he could extract a little produce, it would not only be a great boon, but the prospect would be an additional inducement to emigration. This plan was adopted in Brazil with duce, it would not only be a great boon, but the prospect would be an additional inducement to emigration. This plan was adopted in Brazil with excellent effect, and it would probably save the planter more than the cost of the land, either in maintenance or in wages. We take the liberty of offering these suggestions with great deference. You will best understand how far they may be adapted to the conditions which exist and how best to overcome the difficulty under which we find ourselves obliged to ask you to modify the conditions imposed upon us in relation to the proportion of sexes, which we find a great stumbling-block in our future course. In other respects, we see no difficulty in continuing this emigration movement for at least a considerable period to your satisfaction. The more we see of these Azorean laborers, the more satisfied we are that they are, as a class, emineutly well adapted to your requirements; they are essentially agricultural; they are better the satisfied we are decided to the content of the property of o
